LET THEM IN.

So long as scores of small children are kept waiting at the school gates to get in so long is there something wrong which ought to be changed. The season will very soon be advanced enough to make it not only uncomfortable for the children to be kept out in the open air so long, but positively dangerous to their health. Rain and snow are not the best things for small bodies not yet matured to very great hardness.

There is a vast difference between coddling children and providing them with only reasonable protection against dangers to their health. It would seem cruel to any one that a small child should be sent out on a cold day without clothing enough to keep him from shivering, providing that it could be had. But these children have to loiter around the schoolhouse gate in snow and rain on stormy days, and that is fully as bad,

Let the scholars arrive too late and they are punished for their tardiness and kept after school." Let them come a little early and they are punished by not being let in.

This is hard on the poor things who tr to be punctual and those who leave poky tenement-houses when their parents go out to work. And so little is needed to remedy this evil. The turn of a key at a time suited to the exigencies of the case, and all would be well. Turn the key!

"King" Kelly's Mother-in-Law's Death Probably Suicidal.

PATERSON, N. J., Sept. 26-An invest. gation is being made into the death of Mrs, John Headifin, the aged mother-in-law of Mike Kelly, the celebrated \$10,000 ball-player and captain of the Boston Playeys League Club.

River, near the Wesel bridge, which cou-nects Passale and Bergen counties, late resterday atternoon. It is not certain whether she committed micide or accidentally fell into the river, but all the circumstances lead to the impressio that she threw herself into the water while

laboring under temporary aberration due to malaria.

Mrs. Headifin was about sixty years of age, and for some time has complained of malaria. Yesterday afternoon she went to der jenleusy an nunecessary evil. Dundee Lake. She was seen there to cut a switch and with it switch the grass and her

lothing.

Her strange actions attracted attention. but nobody interfered with her. About 4 o'clock the mounted the parape of the Wesel bridge and either jumped or fell from the top of the span into the river. Her descent was witnessed by a man, who notified Thomas Howarth, who lives on the bank of the river near the spet. Mr. Howarth took a boat and rowed to the scene where the man said he saw the body

strike the water.

When he reached the spot he was surprised to see the lifeless form floating on the surface. The buoyancy of her clothing had evidently prevented the body from sinking. Her face only was beneath the sinking. Her face only was beneath the surface.

Mrs. Headifin lived with her husband and son in this city, and they did not learn of her death until has evening. They said she had been ill since her return from the new home which was presented to her sonnin-law, tapt, helly, by the citizens of flingham. Mass., where she and ter husband hat been visiting.

She had been taking large doses of uninine, in the hope of breaking the malaris, and they believe her mind had become temporarily clouded from the effects of it.

When she left her home about 9 o'clock in the morning, however, to walk through the Celar Law, section of the city to obtain some fresh air, she appeared to be all right and there were no indications that she thought of seeking death.

It is believed that while out walking the effects of the quining began to be manifested, and that she them wandered about aimlessly until she found herself on the bridge, when an ancontrollable impulse led her to leap into the river.
